# OTHER ACTIVITIES

- Founder dAutowale (A college startup providing on-demand transportation service).
- Ex. President of iCoders (Official Tech Club of BCREC, Durgapur)
- Microsoft Student Partner (From Nov 2015 - Oct 2017)

#### **EXPERIENCE**

#### **Software Engineer**

#### Tekenlight | Dec 2019 - Present

- Currently working on a client project which is a digital banking application where I lead the backend dev team.
- Design and developed a reporting engine using the Spring Boot, Apache Airflow as the scheduler and Apache Camel as integration framework.
- Design and developed multiple adapters to parse different payment message formats like <u>BAI2</u>, <u>CAMT052/053</u> and <u>MT940/942</u>.

#### **Software Engineer**

#### BillionLoans | Jul 2018 - Nov 2019

- Developed a Blockchain application using R3 Corda for Invoice Discounting and deployed on the cloud (AWS).
- Developed powerful dashboards using Angular with ngrx for different types of users.
- Designed and Developed Access Control Framework for the SSO application.
- Designed and Developed a Personal Finance
  Management Application as a PWA using ReactJs for an
  early-stage startup. Used Firebase services for backend
  and React Native to wrap PWA so that it can be
  published on play store.

#### Intern

#### BillionLoans | Feb 2018 - Apr 2018

- Completed a POC involving the integration of DigiLocker services to the current onboarding platform and then use OCR to extract data from the document.
- Designed and developed a mechanism to fetch data from an existing tally plugin and replicate it using CouchDB and then used a scheduler to push data from CouchDB to another server periodically.

## **SKILLS**

#### Languages:

- Java
- Python
- Javascript

#### **Tools & Technologies:**

- Spring Boot
- AWS
- Firebase

- ReactJs
- SQL/NoSQL
- Git
- Angular
- Docker

Gradle
